### Product Description

Small campers, campers, off-road RVs, standard hardtops, campsite trailers, caravans, caravans, camper trailers  
Just like a Swiss Army knife, the HQ12 is equipped with a kitchen, toilet and shower room and can accommodate a family of 4 people. This compact design is perfect for weekend campers who want to embark on an adventure.

Our Product Introduction

#### Suspension system

Has a powerful independent suspension system. We have developed our own custom-designed trailing arms that allow each wheel to move independently, allowing for a smoother, more stable ride, whether on the highway or on rough terrain. Our quad suspension design spreads the load across four shocks instead of two, resulting in a smoother ride, safer operation, and longer suspension life.

#### appearance

The HQ12 is designed to be more compact and lightweight, with the same rugged appearance as other higher-spec series. Still with our revolutionary independent suspension, the latest in our flagship range can handle all off-road situations while offering a more compact, streamlined look for easy towing and parking.

#### indoors

Somehow, we were able to pack all the same features of our premium touring trailer line into a single 12-foot hardtop trailer. A family of four can have plenty of space while having all the amenities you'd expect in a black travel trailer.

Full 360° rotation and unmatched clarity mean you can tackle even steep slopes.

The small footprint and concealed design allow the car to be parked in most residential garages

The clever design allows a family of four to enjoy plenty of living and sleeping space.

All homely comforts including kitchen, air conditioning, toilet and shower.

Our foldable tables and beds are designed for entertainment during the day and comfortable rest at night.

#### Exterior
