### Product Description

Trips for two people are usually romantic, free, and freewheeling  
But when you bring the baby, it's a different experience  
However, we are still fascinated by family travel  
Let us be filled with hope  
Because it will allow us to meet a different version of ourselves  
It will also allow us to meet different children  
Walk slowly with your child and get in touch with a different world  
The scenery, passers-by, and feelings experienced along the way  
It will be an experience worth remembering in life~

Our Product

T536 parent-child trailer RV  
Motorhomes designed for families  
In the camp, come and feel the happiness and sweetness of the small family~  
Exterior of the vehicle

The appearance of the vehicle is more rounded, the length, width and height are 9470 \* 3000 / 3100 \* 3270 (mm), the body is painted in the style of comics, which is very childlike, I believe that the children will be attracted by this behemoth at a glance.  
The car is mainly used for suburban self-driving tours, regional family camps.

### Vehicle interiors

When you enter the interior of the vehicle, you will immediately feel that it is a bright and colorful little world.

The light and lively color scheme is a favorite element of the children, and it is full of fun. The sofas, tables and chairs and bedrooms are also very childlike, and the design of the circular arc can effectively avoid children from being bruised and bruised.

The ceiling and walls are designed with elements such as starry sky and castle, which can infinitely expand children's imagination, and the car is very warm and comfortable under the yellow lighting effect.

Vehicle layout

The vehicle space is larger, the bedroom, living room, bathroom and other facilities are complete, the layout is more reasonable, the L-shaped card seat of imitation leather fabric saves the space in the car well, and the coffee table can move freely. At the same time, the bedroom area and bathroom have good privacy, and there are separate door frames for separation. Even when you're traveling, you can create your own private space.

The living room is fully equipped with a smart LCD TV for you and your family to enjoy their entertainment. At the same time, the master bedroom and living room are equipped with wall-mounted air conditioning, which has a stronger cooling capacity and is more practical for zonal temperature control.

### Bedroom layout

There is a double bed at the front and bunk beds at the rear, which is more suitable for two generations of families while ensuring privacy.

The upper and lower bunks are made of wooden planks, and protective fences are set up to prevent children from falling down when they sleep at night, which is safer.

The master bedroom is also equipped with a panoramic skylight, so you can enjoy the starry sky with your children at night!

toilet

The bathroom is equipped with a separate wet and dry bathroom for your convenience, with a vanity mirror, shower head, towel rail, shelf and paper tray.

The external water pipe of the car is equipped with an electric slow heating belt, which can be opened at low temperature to effectively prevent the waterway from freezing and cracking. The body wall is thickened to 50mm, which is more insulated, and the heating is optionally equipped with an electric heating module, which has higher heating efficiency, even in the cold winter, it can also let you experience the warmth of home!

### Body technology

1. The box body adopts a sandwich board structure formed by negative pressure, using an aluminum skeleton diamond closed ring and high-density XPS foam, the outer layer is made of fiberglass, and the inner wall is a lightweight, mildew-proof and moisture-proof GMT laminated board to create a high-strength RV box and adapt to a variety of environments;
2. Yutong chassis adopts electrophoresis process, and before the vehicle leaves the factory, the damping glue is sprayed for chassis anti-corrosion treatment, which can effectively cope with sandstorms, coastal, high humidity and other environments;
3. Yutong has established a 3AQS three-level in-vehicle environmental protection control system from raw materials, parts to the whole vehicle, the raw materials are GMT interior panels, water-based ink floor leather, imported environmental protection glue and other environmental protection materials, using Germany parts formaldehyde monitoring method, all parts formaldehyde test qualified before use, environmental protection level is better than the national standard.
